

## Technical Data Sheet

### Product Description

Aqueous emulsion of poly dimethyl siloxane for various mould release application

### Features

Excellent Release Properties

- Improves Gloss, Slip, Wetting and Water Resistance
- Non-ionic in nature
- Suitable for both Rubber release and EVA release. But preferred by EVA release customers,

### Specifications

Parameters	Unit	Value
Physical form		Thick emulsion
Appearance		Milky white emulsion
Solid content	%	15 ± 2%
pH		6.5 – 8.0
Nature		Non-ionic
Compatibility		Easily miscible in water.

### Applications

Mould Release Agent for various substrates like plastic, rubber, other polymers

- Car Polishes
- Lubricant in formulations used for textiles, thread etc

### Packing & Storage

- 50kg carboys
- Shelf life: 1 year if stored in proper condition

We believe that the information in this publication is an accurate description of the typical characteristics and/or uses of the product or products, but it is your responsibility to thoroughly test the product in your specific application to determine its performance, efficacy and safety. Suggestions of uses should not be taken as inducements to infringe any particular patent.
