

Technical Data Sheet**Product Description**

UC- 39 is an aqueous emulsion of poly dimethyl siloxanes used for various industrial applications

Features

- Excellent Release Properties
- Improves Gloss, Slip, Wetting and Water Resistance
- Non-ionic in nature
- Very good stability over extended period

Specifications

Parameters	Unit	Value
Appearance		Milky white liquid
Solid content	%	35% - 38%
pH		6.5 – 8.5
Nature		Non-ionic
Specific gravity		1

Applications

- Mould Release Agent for various substrates like plastic, rubber, other polymers
- Car Polishes
- Lubrication of extruded parts
- Lubricant in formulations used for textiles, thread etc
